## Recommended Reading

The staff at LeGrande PLLC believe that the best decisions are made after the full consideration and understanding of all facts and contingencies that affect decision-making processes. Digital artifacts are highly volatile and can be destroyed or rendered inadmissible by the most simple of mistakes. If you are new to the realm of digital evidence and digital forensic examinations, or are an experienced pro that could use a refresher, we highly recommend this straightforward and easily comprehended text:

*Digital Forensics for Legal Professionals: Understanding Digital Evidence From The Warrant To The Courtroom* (2011) by Larry Daniel and Lars Daniel. Syngress Publishers; 1<sup>st</sup> edition; ISBN-10: 159749643X; ISBN-13: 978-1597496438

# LEGRANDE PLLC

**LEGRANDE PLLC** was founded by Dr. LeGrande “Doc” Gardner (PhD) who currently serves on the faculty of the University of South Florida Polytechnic (USFP) as Director of the Digital Forensics Laboratory. He also develops and instructs courses in Digital Forensics at USFP. “Doc” retired from over 25 years in professional law enforcement as a sworn officer to include an appointment as a Special Agent with the Federal Bureau of Investigation (FBI). With over 30 years experience working with computers, “Doc” includes among his accomplishments having supervised the Digital Forensics Laboratory at a municipal law enforcement agency for over a decade where he actively conducted digital forensic examinations in addition to supervising examinations conducted by Detectives. In his last three years of active law enforcement service he was assigned as a Task Force Agent to the FBI’s Cyber Crimes Unit.

Other professional career law enforcement practitioners with years of experience and established backgrounds in cyber crime and digital forensics joined “Doc” at LeGrande PLLC to form a staff with a unique set of qualifications.

## All Examiners Are

Current and Retired Career  
Law Enforcement Officers

•  
IACIS Computer Forensic Certified  
Examiners, CFCE

*(International Association of Computer  
Investigative Specialists)*

•  
IACIS Certified Electronic Evidence  
Collection Specialists

•  
AccessData Certified Examiners, ACE

## Why is law enforcement experience important?

A computer forensic examination is an investigation, much like any other exploration of possible wrongdoing performed by law enforcement every day. The digital evidence recovered during a computer examination has a direct impact on decisions that may cause the termination of employment, the taking of one's freedom, impose monetary losses, and/or adversely affect one's reputation. Inexperience and the lack of proper qualifications at any phase of the computer analysis can result in the inadmissibility of evidence and can open the door for potential civil litigation. An examiner with both extensive experience and proper qualifications will assure that these consequences are supported by the most accurate, reliable, and valid findings.

## Civil Litigation

We provide services for civil litigation in areas such as but not limited to:

- Theft of intellectual property and proprietary data
- Embezzlement and Fraud
- Theft of trade secrets
- Divorce
- Threats & harassment
- Sexual harassment lawsuits
- Phishing and stalking
- Employer or employee misconduct
- Employee wrongful termination claims
